

### **TMDL Technical Report**

This report focuses on the evaluation of pollutant sources and the amount of pollutant load reduction that needs to occur, to achieve water quality objectives protecting the optical properties of water in Lake Tahoe. This is the first step towards completion of Final Lake Tahoe Total Maximum Daily Load (TMDL) for fine sediment, nitrogen and phosphorus which are the pollutants responsible for the continued loss of deep water transparency in Lake Tahoe.

### **Lake Tahoe TMDL load Report**

This document is the Staff Report that summarizes the Numeric Target, Pollutant Source Analysis, Load Allocations, Implementation Plan, Adaptive Management Process, and the required Regulatory Analysis for the Lake Tahoe Total Maximum Daily Load (Lake Tahoe TMDL).

### **Lake Tahoe Crediting Handbook**

The Lake Clarity Crediting Program (Crediting Program) establishes the framework that connects on-the-ground actions to the goal of restoring Lake Tahoe clarity. It defines a comprehensive and consistent accounting system administered by the Lahontan Regional Water Quality Control Board (Water Board) and the Nevada Division of Environmental Protection (NDEP) to track pollutant load reductions from urban stormwater using Lake Clarity Credits. The Crediting Program aligns policies with ongoing implementation in order to drive accountability and motivate effective action to improve Lake Tahoe clarity.

### **California NPDES Permit**

This permit update maintains the previous storm water management program requirements and adds pollutant load reduction and associated monitoring requirements to implement the Lake Tahoe Total Maximum Daily Load program.
